

FINDING WORK

ROCK SOLID GROUP OF COMPANIES

The Companies

The RockSolid Group of Companies is dedicated to the innovative delivery of oil and gas services. The Corporate/Operations Head Office is located in Vermilion, Alberta with strategic operations located throughout the western provinces. The comprehensive line of services meets the well servicing and production optimization needs of exploration and development companies across the Western Canadian Sedimentary Basin.

RockSolid Nitrogen has seven pumpers all run with heat recovery systems, capable of rates up to 85scm/min @ 10,000psi. The units are all equipped with the newest in safety features, computer systems, as well as experienced operators. Also we have four bulker units on the road which each hold 26,000scm of product. In addition Rock Solid has 4 cement acid pumpers, as well as a foaming unit c/w 55m3 flow back tank.

T-Rock Coil Tubing Services Ltd. Has 5 coil tubing units, of which 4 are class II capable and of which 2 are intermediate unit's. Sting sizes vary from .75" to 2".

Rock Solid Rentals Ltd. Has patent technology having portable storage tanks each with a capacity of 600 m3. One bladder is equivalent to 10-400 bbl tanks. This patent technology allows the customer the benefit of ease of setup (less than 2 hours), less man power, environmental benefits, and of course bottom line financial savings.

RockSolid Group of Companies boasts state of the art, cost efficient, and safety oriented technology that is supported by a management team with 75+ years in the oil and gas industry. The company currently employs 50 full time employees.
